

NOTICE OF CONSTRUCTION

This notice is to advise you that construction will commence on or about, **January 24, 2025**, or within the next **14 days**. The Village has contracted with Hallack Contracting and Gustafson HDD to construct water system improvements, funded through the State of Michigan Department of Environment, Great Lakes, and Energy (EGLE). Many of you may be aware of this project through the number of Public Meetings that have been held regarding this project, beginning in May 2023. The project entails watermain and service line replacements along Third Avenue, Sands Street, Lowell Street, Green Street, Bridge Street, Rutledge Avenue, Chester Street, and Ridge Road, as well as the construction of a new municipal water supply well along Ridge Road, as seen in the provided map below. In addition, water service line replacements will occur at various locations throughout the Village. Construction will be ongoing throughout the year and is expected to be completed in the Fall. During this time, you may experience minimal interruption of water service, road detours, and at times, limited access to driveways. Any grass or pavement that is disturbed as a part of this project will be replaced. For the homes that will have their water service lines replaced up to the house as a part of this project, a representative from Hallack Contracting, Gustafson HDD or the Village will ask to access your home to verify the material and location of your water service line. We will do our best to notify those homeowners in advance. We apologize for any inconvenience ahead of time. If you have any questions, please call:
